Crown-Purple Heat Eater

Heat-Resistant Compound

Typical Applications:

Crown-Purple Heat Eater is a heat resistant compound that will form a protective shield to prevent over-heating, distortion, and buckling caused by soldering, brazing or welding. It can be used as a heat sink to absorb heat and avoid surface discoloration on heat sensitive parts. It can be used as a heat dam to prevent heat from traveling to areas that can be damaged by heat such as O-rings, enamel sections, rubber, plastic and paint.

Crown-Purple Heater Eater also shapes like putty and holds irregular parts firmly in place without melting, swelling or disturbing alignment.

Specifications:

- Asbestos Free
- Doesn't Contain Any Toxic Elements
- Withstands Temperatures to 3000°F
- Reconstitute with Water

Procedure:

Position the parts to be joined in enough **Crown-Purple Heat Eater** to support their weight. Parts that need to be protected from heat should be covered in a layer of **Crown-Purple Heat Eater**. If moisture is harmful to a protected part, a piece of plastic wrap should be applied first.

Packaging:

2# jar
5# pail
